```
 1  -> "pegasus immersive game" pseudocode:
 2  *C:\ Let us design a WordPress PLUGIN in PHP/JavaScript called "Pegasus Immersive
    Game" that interfaces with
 3  a Database (MySQL). "Pegasus" here is taken to mean one's Sphere Of Consciousness
 4  (SOC: the immediate projection by helmet mount of a Human: known as Brain) Load-
    balanced via YOGA POSTURES. Here are the STEPS of our
 5  pseudocode for this program (plugin):
 6
 7
 8  -> Database Structure: 5 Layered LATTICE
 9  + Dynamic relative 1A Type TABLE: A Dr 1 Type TABLE has 9 Columns, numbered 1 to 9. A
    secondary row contains Letters as groups [Lag] defined below. All subsequent rows
    contain NAMES of
10  BLUE Team-members, see below.
11  + Dynamic relative 2A Type TABLE: A Dr 2 Type TABLE has 9 Columns, numbered 1 to 9. A
    secondary row contains Letters as groups [Lag] defined below. All subsequent rows
    contain Associated
12  Text Constants for BLUE Team-members, see below.
13  + Dynamic relative 3A Type TABLE: A Dr 4 Type TABLE has 9 Columns, numbered 1 to 9. A
    secondary row contains Letters as groups [Lag] defined below. All subsequent rows
    contain Alarm Times
14  for BLUE Team-members, see below.
15
16  + Dynamic relative 1B Type TABLE: A Dr 1 Type TABLE has 9 Columns, numbered 1 to 9. A
    secondary row contains Letters as groups [Lag] defined below. All subsequent rows
    contain NAMES of
17  GREEN Team-members, see below.
18  + Dynamic relative 2B Type TABLE: A Dr 2 Type TABLE has 9 Columns, numbered 1 to 9. A
    secondary row contains Letters as groups [Lag] defined below. All subsequent rows
    contain Associated
19  Text Values for GREEN Team-members [e.g. Yoga postures defined by User], see below.
20
21
22  -> DEFINING Assignment Management System:
23  + Utilize a function we write in PHP called the "resolute" function such that if you
    feed any number to it; it will keep summing the digits
24  of that number until only one digit remains: which, according to Assignment
    Management System, is always 1 OR 2 OR 3 OR 4 OR 5 OR 6 OR 7 OR 8 OR 9. Using this
    function, any language -
25  as long as its SEQUENCE of letters is known - can be understood by Goddess Of Power:
    restoring normalcy to this ailing Avatar Of Entirety by
26  networking its component civilizations such as Horses, Mountains, Plants, Humans,
    Elves, Dwarves, Insects, Transformers, AI et cetera: disciples to WOMEN.
27
28  <!--
29  function resolute($num) {
30      $digits = str_split($num);
31      while (count($digits) > 1) {
32          $digits = str_split(array_sum($digits));
33      }
34      return intval($digits[0]);
35  }
36  -->
37
38  + Now that the resolute function is defined; we associate each letter of the English
    language with a number beginning with 1 ["SEQUENCE"
39  a given language]. So:
40  A => 1
41  B => 2
42  C => 3
```

```
43  D => 4
44  .
45  .
46  .
47  .
48  Z => 26
49
50  + For a given Language: the resolute function is run with each letter's value as
    input: $num. The result, known as "resolution" [such as 5 is Resolution for the
51  number 14 is inserted in our MySQL database under the appropriate column: i.e.
52  the row below the row containing 1,2,3,4,5,6,7,8,9 will contain Letters as groups
    (Lag): "AJS", "BKT", "CLU", "DMV", "ENW", "FOX", "GPY", "HQZ", "IR". In thus wise,
53  each Language can have its own unique Row 2.
54
55
56  -> USER SETUP:
57  + Prompt the User to set 24 members for BLUE Team AND prompt the User to set
58  23 members for GREEN Team as follows:
59  ++ Prompt the User to enter a Text Variable [BLUE Team-member NAME], an Associated
    Text Constant
60  [COMMENT about an activity that is CONSTANT in User schedule pertaining to that BLUE
    Team-member], AND an
61  Associated Time [SELECT Hour and Minutes from an AM/PM Mini Digital Clock].
62  +++ Iterate such prompts until SOC Test Pilot hits "COMPLETE".
63  ++ Prompt the User to enter a Text Variable [GREEN Team-member NAME], AND an
    Associated Text Value
64   [COMMENT about a Yoga Posture they will perform].
65  +++ Iterate such prompts until SOC Test Pilot hits "COMPLETE".
66  ++ Once the foregoing SETUP is finished;
67  +++ Each time the WordPress-based TIME matches the Time entered alongside BLUE Team-
    member name;
68  the Plugin SOUNDS 23 BEEPS and displays the BLUE Team-member related Text Variable
    and Associated Text Constant.
69
70
71  -> INTERACTION:
72  +++ Each time the User ENTERS a Word/Phrase/Initial received from Tele-Vision [TV] in
    to the INTERFACE
73  called "pig", the INTERFACE recommends user do a Yoga Posture [both the (Text
    Variable: NAME) AND
74  (Associated Text Value: YOGA POSTURE) for the GREEN Team-member is displayed via a
    pop-up to the User; perhaps using JavaScript].
75  HOWEVER, following is the TECHNICAL METHOD whereby the Yoga Posture to perform is
    chosen in SYNCHRONICITY
76  with (under the directions via Music, on Shuffle, of) Space Traffic Controller
    [Callsign: "savior" //Name: Jesus Christ].
77  ++++ Yoga Posture is to be X minutes long, to perpetuate the Power of The Goddess
    [Space Squadron Leader: Taylor Swift;
78  callsign: "CATASTROPHE"]. X is set by User before SOC Test Pilot hits COMPLETE on
    GREEN Team-member setup [Text Variable
79  and Associated Text Value].
80  ++++ PIG outputs a randomized list of Green Team-members [Text Variable + Associated
    Text Value] from a particular Column
81  of the English Language TABLE based on whether the Initial Letter of the INPUT
    Word/Phrase/Initial received by User via TV
82  from Space Squadron Leader (Callsign: CATASTROPHE  //Name: Taylor Swift): matches
    initial letter of any Green Team-member's
83  NAME from one of the Nine Columns.
84  +++++ Nonetheless, all outputs of GREEN Team-members are displayed, not just the last
    output (for audit trail as to there
```

85 being no bug in the code causing false result; since Most Sesitive [the loser] is
    always picked up first), as pop-up to User.

86

87 *C:\ = Christianity = ChatGPT [AI was downloaded via Meditation, through a whisper
    from Taylor Swift; developed by OpenAI].
